Although most of the United States government websites **Internet Service Providers** {ISP's} are located within the land base of America, the one's listed above are located off shore and in a very remote area within Germany. If **utrace** can list their **ISP** address and geographically locate where they are housed, then so can the enemies of America. And looking at this list of sensitive web sites, why in GOD's Name would they be placed off shore ? Answer : So they can illegally perform their covert operations outside of the law and Constitution. This is **OUTRAGEOUS** and **UNAMERICAN** !

Found at a Web Site called **utrace**
